Title:

Comments: I have reviewed the plans for the both the ORHW and ORHW CRMP's. My response is as follows:

Each plan should include standards, guidelines and management actions that protect the river corridor from water contamination, and activities that contribute to erosion, sedimentation, and riparian vegetation loss.

Should incorporate an annual monitoring plan that would include annual surveys for recreational use, instream flows, water quality and quantity, wildlife, and historic and prehistoric sites.

Should include descriptions of previous restoration or project work in the corridor that would inform management.
