Title:

Comments: Any cut logs that are usable as lumber should be removed and made into lumber. Any logs not lumber quality could be left on the side of the road on the ground and open the area to free fire wood cutting. Then at the appropriate time anything left over should be burned onsite.

Ideally over time all previously open roads should be open again and all previous open recreation areas should be open again for use. Opening all areas may take several years but without these recreational opportunities people are forced to go to more crowded places. Our population is expanding and our recreational opportunities need to keep pace.
