Comments: I would appreciate a cabin on the road system somewhere on south side of Mitkof island along woodpecker cove road. I think that this would be used by people who do not have the access to a vessel or have handicap constrictions. In the winter, snowmachiners and trappers could use the cabin or people could park at the Olsen campground and cross country ski back to the cabin. I also think a cabin accessible by water near blind slough would be nice as well.

I would also like to add a request for a anchor buoy near the Kasheets cabin as well. This would give me greater comfort knowing my vessel was firmly anchored while I am separated from it at low tide.

Thank you for all your hard work!

Respectfully,

Amy Anderson
