Comments: I would advocate for a cabin up Petersburg creek accessible by jet boat, kayak, or by hiking a short section of the Petersburg Lake trail from the Kupreanof dock.

I also think a cabin on the road system with a short walk (ADA compliant) would be nice. Preferably on the south end of the island (woodpecker, olsons, ideal cove etc.

I would like to voice strong opposition to cabin sites at locations that naturally have good camping such as Clover Leaf and Dry Bay. I believe that maintaining good camping areas for tents in remote wilderness should be a priority. Placing cabins where camping may not be as suitable gives more access to the forest where people wouldn't typically go.
