Comments: I directly oppose the development of a gondola at Taos Ski Valley. It is an extravagant, superfluous development that will have significant impact on the fragile ecosystem that exists in the area. I condone the use of public money for this kind of private gain. Taos County is home to many residents who will not benefit from this use of public money. Basic needs are not being met for a large portion of county residents while projects like this benefit visitors who do not pay taxes and are not permanent residents.

Secondly, I adamantly oppose further privatization of Taos Ski Valley access to trails and public lands. I understand this trend is happening all over this country as funding for maintenance of public lands is at stake. However I will continue to oppose such privatization as OUR PUBLIC LANDS ARE NOT FOR SALE.
