Comments: The main problems with this area currently are the camping around Blue Lakes and parking at the Blue Lakes trailhead. I would like to see a permitting system that doesn't penalize those that are neither camping nor parking in this area. Dallas Creek to Blue Lakes to Camp Bird makes a great loop out of Ouray. The current proposal would have a camping permit and access permit. I would like to instead see a camping permit and parking permit. That would effectively control the number of visitors without impacting those that often use the area as a through hike.
