Comments: Please Don't Log the Taylor/Carter LSR

Dear District Ranger Luis Palacios,

The significant negative impacts of salvage logging and timber plantation establishment on wildlife, watersheds, and soils are well documented and known to the Forest Service.

As you know, wildfire is an important part of forest ecology in the Klamath Mountains

.

I would like to add my voice to the many people who oppose post-fire "salvage" logging and timber plantation establishment in the Taylor/Carter Late Successional Reserve. Even wildfires should not be used as an excuse to log Late Successional Reserves in remote wildlands.

Please work with communities and stakeholders to focus post-fire restoration on removing hazard trees near roads, addressing existing timber plantations, and utilizing prescribed fire and traditional ecological knowledge?

Thank you.

Sincerely,

Ms. Catherine Cogdill
