Comments: Dear Sirs/Madams,

I write to express my strong objection to the White Mountain National Forest Environmental Assessment (EA) for the Tarleton Integrated Resource Project. This is a pristine and important national resource and is treasured by the thousands of people who enjoy its beauty. I disagree with your zoning designation which will allow the destruction of a considerable amount of land surrounding Lake Tarleton.

Over fifty years ago, I was both a camper and a staff member at Kingswood Camp. It was on Lake Tarleton where I learned to swim, sail, fish and waterski. I also developed a strong appreciation for the beauty of nature. As I look back now, I still remember how the pristine water and incredible views inspired values and principles which I carry to this day.

Please give serious consideration to changing your designation of the area to an M 8.5 (Scenic Area). By doing so, you will be preserving an incredible natural resource for all people to enjoy.

Thank you for your attention to this letter.

Sincerely,

Peter Mandeau
