Comments: I am strongly opposed to logging in the White Mountain National Forest, and in particular in the Lake Tarleton area. I first enjoyed the White Mountains while visiting my brother in college in the early 1990s. I have been hiking in the area many times. My two children attended summer camp for over a decade at Kingswood Camp, which is across Lake Tarleton from an area that is being considered for significant clear cutting and logging. This logging would spoil a tremendous national resource. Please maintain the forests around Lake Tarleton and in New Hampshire.
