Comments: I am writing to voice my concerns over the proposed logging of the trees on or near to the Lake Tarleton shoreline. Lake Tarleton is a unique space with the natural beauty and undeveloped shoreline of a private lake but with a public boat launch. The proposed logging wil fundamentally alter the vista and beauty of this unique habitat. I have travelled from the UK many times over the last 20 years to visit Lake Tarleton at great personal expense because I truly believe it one of the most beautiful places I have travelled to.

There are no doubt many others tracts of land available for this plan and I urge you to reconsider this. At a time where we know the environmental security of the world is at risk I urge you to act as responsible stewards of the land and not to act to benefit people in the short-term.
