Comments: As a mother of a son that has attended Camp Kingswood, I can attest to the incredible memories he has that are largely based on the natural beauty of the land surrounding the lake. I understand the economics of this decision ahead; however, I would plead with this committee not to allow logging/development in this area so future generations of kids can have the same memories of this natural beauty. Further, as someone not from New Hampshire, the beauty of the forest surrounding the lake is what I think of when I think of your amazing state.
