Comments: I am in support of these projects. Specifically, the base to base gondola. Not only would this reduce traffic and increase safety on Twining, but the reduction would also decrease automotive runoff and debris pollutants in the river. The gondola will be a cleaner way to move people to the Kachina basin area and provide more inclusive access to our public lands since many are not willing or do not have the capability to drive up the narrow dirt road.

I also approve of the need for the proposed water tank that would provide a more efficient fire fighting capacity.

A lift 7 restaurant will not only provide a better guest experience but give people a chance to warm up, use facilities, and take in some needed calories in order to have a safe ski day.

The nordic and snowshoe area will give people another way to connect with outdoor sports. People who spend time in the outdoors are usually much more concerned with the environmental impacts of thier everyday choices.
