Comments: I am writing to support this project. The potential for wildfire is a constant concern with fire season seeming to become a year round reality around the state. I hope recent significant fires around Colorado and the west will inspire some urgency with this project. Additionally, this project will benefit the Bighorn Sheep that are in the area and are experiencing habitat loss due to the lack of natural fires and their inability to easily access and utilize their entire range. A prescribed burn was originally proposed in 1998 for the benefit of the herd and unfortunately the community pushed back on it.
