Comments: To whom it may concern,

I believe there is a far more important piece of private property to consider for this exchange.

In the Winter Park and Fraser area a key trail has been closed by private land owners. This trail is the Ridge Trail which provided access to the Idlewild Trail system for decades. Closure of the trail has resulted in a change in access causing crowding at the Meadow Trailhead.

This parcel of land has been identified by the Town of Fraser Trustee Andy Miller, as a key parcel to obtain in order to restore public access and reduce crowding at the Meadow Trail which is currently the only public access to the Idlewild trail system from Winter Park / Fraser Area.

I live in the neighborhood and am now unable to access this public land and trail system, due to the closure of the affermentioned private property.

I would encourage you to strongly consider this alerternative land exchange.

Thank you
