Comments: I have been coming to Lake Tarleton since 1985, when my husband and I bought Kingswood Camp. We were thrilled when 22 years ago 7.5 million dollars was raised to purchase and protect the Tarleton area. Our campers come from all over the world to enjoy the beauty and serenity of Lake Tarleton. I believe the area surrounding Lake Tarleton should not be designated as MA 2.1, General Forest Management. It should be reclassified as MA 8.5, Scenic Area. This would eliminate timber extraction, cell towers, wind turbines and other development. I worry that, in addition to ruining the beautiful view, erosion and would compromise our water quality. After heavy rains, we can hear water running into Lake Tarleton as if it were a faucet filling a bathtub. President Biden is launching a process to protect mature and old growth forests on federal public lands. These old trees contain much carbon and help us in our desperate need for climate control. Please please reconsider your Tarleton Integrated Resource Plan. Don't let our pleas fall on deaf ears.
