Comments: I am in support of the TSV improvements proposed in the plan. In particular with respect to the construction of a gondola to move traffic between the main lodge and Kachina Basin alleviating road traffic on an overburdened and inadequate road between the two. Erosion control on the steep terrain is impossible on the current road and will only increase with additional traffic. Alternative means to move both summer and winter visitors between the upper and lower basins with less environmental impact only makes sense. In addition I support the addition of nordic ski options at the northern edge of the property. Presently few options exist for such recreation nearby forcing many to travel to Red River and beyond. The Enchanted Forest being the nearest nordic ski area means a lengthy trip for many Taos residents. It as well suffered major damage in the recent windstorm. Having an area closer in would benefit local residents and visitors.

I also am wholeheartedly in support of wastewater improvements necessary to improve and meet discharge requirements from the treatment plant into the river. I would urge the commissioning of a stream survey to gauge downstream health and establish a baseline from which to measure success.
