Comments: It's time for those who manage public AND private lands in NH and VT to reconsider logging practices. The current approach is not only NOT sustainable, it's negatively impacting the quality of life for local residents, for tourists, and for the creatures of the forest and pristine lake. Please keep this place forever wild. The plan to log 880 acres is completely short-sighted and stuck in outdated mindset around logging and forestry practices. Do the right thing here - cancel plan to log and look for other sources of revenue - such as a piece of the tourism pie that draws in millions of visitors to the White Mountain region every year to get a piece of idyllic wildness they can't get anywhere else. this is a sacred place that needs to be protected!!!!

Thank you,

Business owner and resident
