Comments: Outstanding!.

Those older green houses were old 20 years ago when my district had stock growing in them. May want to take a video for posterity sake before they come down.

My only concern would be if there was push back to contract with private industry nurseries as was the case during previous administrations in DC.

I know that the CDA nursery grows superior stock at market costs or less and that the nursery superintendents will continue to do so.

Thanks for the opportunity to provide input!
