Comments: SNF TMP questions

Dear SNF planners:

How may I get questions answered regarding the newly released SNF TM PEA?

For instance, when comparing the maps showing district proposals and the table showing the proposals and rationales, I find a proposal number on the map that does not appear on the corresponding tabular list. So, in alt 3, what is proposal WR 87 noted on the FS 556? That proposal does not appear on the table for WR proposals. I suspect there may be many more puzzling surprises in here.

So, to whom may I address questions as I try to dig through this thing?

Also, are you going to have the webinars available to folks who were not able to attend the sessions last week? I imagine quite a few folks other than myself were out in the backcountry last week as the first weeks of August are kind of predictable that way. I don't see the webinars in the document library on the TM page.

Thank you,

Kim Wilbert
