Comments: Comment on Clarks Fork Access for recreation

Hello,

Thank you for conducting this travel assessment and opening this time up for comments. I am an active recreational user of the Clarks Fork Canyon and would like to continue to have access to existing roads already designated as NSFR. Specifically, I use road 110.1A and 110. I would appreciate continued use of this road in normal, highway-legal vehicles.

I would additionally like to comment that I am worried about the grazing permits for cattle in this area. Having hiked in this area for many years, I notice a destructive force of cattle on the little amount of wetland that exists on this land. When cattle are permitted to graze, fewer birds use these areas.

Thank you for taking the time to review comments from the public. Please feel free to reach out with followup questions.

Best regards,

--
