Comments: I am interested in where the funding will come from for this expansion? I asked Paul Schilke, the person on the notice indicated to answer questions, and all I learned was that funding would not come from the Forest Service. I oppose this expansion until I understand where the funding will come from. This is a private business - would the funding be coming from Taos Ski Valley corporation? If not, who is paying for it? Thank you for providing more information in order to generate relevant comments from the public.

Additionally, has there been a study on water impacts to the valley? If not, I object to this project. I would need to know the impacts on water availability in the rio hondo and other local waterways.

Thanks! Hilary
