Comments: I completely support Bitterroot Front #57341 plan for fire control of the Bitterroot front. The fires of the past in the Bitterroot forest have been devastating to home owners property and unfortunately loss of livestock and death of people themselves. We must take action to minimize the extent of the overall range of the fires, and the long range effects these fires leave for years. The fires not only impact private property but have a impact on the wild life and wild life sources of feed. These future fires with proper pre fire preparation could significantly minimize the long range effects of the fire but also prevent the intensity of the the fires in the future. Thank You
Tony Rizzo
