Comments: My son has attended Kingswood Camp on the shores of Lake Tarleton for the last many years and hopefully will for many to come. While we live in Virginia, we have familial ties to the area including Kingswood Camp as well as Warren, NH.

Lake Tarleton is a very special place and I was dismayed when made aware of a threat to this pristine and beautiful location. I have reviewed the proposal and believe that the project will irrevocably damage and change the Tarleton region.

I absolutely support the suggestion that the land has been incorrectly zoned and should be re-classified as a MA 8.5 (Scenic Area), which would prohibit timber extraction, cell towers, wind turbines, and other development that would diminish the area's scenic, cultural, or natural values. It seems clear to me that Lake Tarleton, the largest lake in the WMNF, with its commanding view of Mount Moosilauke, the tallest mountain in the western WMNF, should qualify as a Scenic Area.

Regards,
