Title:

Comments: The intent of this letter is to express my support for the Bitterroot Front project. The treatments proposed for this project are justified and appropriate given the current condition within the project area. All current fire risk assessments identify the bitterroot front as posing an extreme risk to wildfire, private property and public safety. As a resident of Ravalli county, I would like to see this threat addressed. The proposed activities are in alignment with the forest management plan and policies that guide management of federal lands.
