Comments: i am deeply opposed to the expansion in any way of the taos ski valley.last year 300,000 visitors have impacted the hondo watershed with continuous ozone creating traffic, increase of air traffic on taos valley floor, and leaking water system, impacting the hondo watershed and acequia system.increasing public usage and homes and condos in the the ski valley does nothing but create problems for those downstream.due to slick permitting and high priced legal chicanery an incredible amount of development was created in the last few years.i ask that all development be stopped, hotels on the edge of the rio condo with no setbacks, moving and excavating of mountains in the guise of green building.i ask that a remediation of ski runs, roads,trails and second homes take priority in a national forest and wilderness area that needs to be shared by all not just a small clique.taos ski valley expansion does nothing good for the people of taos.the locals are not even welcome there in the corporate ski valley as they were when ernie blake ran the place.no expansion for profit
