Title:

Comments: this expansion impacts the water, culture and historic lives of families downstream.i request that no expansion continue, an environmental impact study be taken, an expansion of the comment period extended and a serious input from local people and organizations.more transparency for the permitting process and less big money legal chicanery.how is it a small group of recreational skiers can have this much public impact, the national forest belongs to all people, not just a select group.i don't see how the ski valley expansion and its environmental impacts can benefit the communities of the taos valley and the mt wheeler wilderness area
