Comments: My family has lived in New Hampshire for many many generations. We love and honor the natural resources of our beautiful state. And, we recognize that any action taken now on these natural resources will impact many many generations to come. We want to preserve and protect these natural resources for ALL living creatures. The Lake Tarleton area in particular is a spectacular treasure. We urge you to abort the plans to log this area and extract lumber. At a very minimum the plan must be significantly modified to reduce the logging and the impact.
