Title:

Comments: This is absolutely the right thing for us to do. Work hand and foot with the

Forest service to make sure this added Fire protection is done. This will give us another chance to once again do clean up on our own private property to make it defensible against the threat of catastrophic wildfire. This is the most sensible plan, and we should all embrace it. The fact that we can embrace the the RC&D plan

at the same time on private property adds to the value of the overall plan.
