Comments: I am writing to express my opposition to the Lake Tarleton Integrated Resource Project as proposed in the April 2022 updated Environmental Assessment.

The removal of a habitat is often the foundation for the extinction of a species. When forests are cut down, it is not only the trees that are being lost, but also countless wild animals, including mammals, birds, insects, Northern long-eared bat, amphibians for whom the forest is home.

With nowhere else to go, wildlife will either perish or be driven into areas that are not suited for them.
