Comments: As a life-long outdoor enthusiast, Taos Ski Valley's skier, and property owner, I to support the Taos Ski Valley Improvement plan (#61390).wr Water Rights are established and recorded with the State Engineer.

While the plan clearly anticipates growth, it is well thought out, considers the environment, water usage, forest management, public access and ultimately the expansion of year-round trails and infrastructure to support greater public use of our great outdoor spaces.

The new 5m gallon Water Tank will make snowm-aking more efficient, improve off-season fire protection, and potentially distribute water with significantly less energy. Further, it will not increase water consumption. The new gondola will be all electric (powered by Kit Carson solar during the day) and will improve mountain access without added vehicle traffic in the valley.

Taos Ski Valley is a world-class ski area, recreational area and community and this plan only makes it better.

Sincerely,

Doug Turner
