Comments: The Lake Tarleton area is a beautiful scenic spot of unusual beauty and peace. My sons have spent many happy years there going to Kingswood Camp for Boys, my grandson and his cousin are presently enrolled in the camp for the coming year and attended camp there last year as well. My husband and I have enjoyed visiting our children and grandchild and vacationing in the area.

We are distressed about the plan to change the nature of this unique and necessary peaceful and beautiful Environment and recreational area. The world and our country needs places like Lake Tarleton that offer peace and restoration. Once the environment is disturbed it will be forever changed.

As a family concerned about the environment and it's value we are hoping that the plan now in place will be modified or abandoned in favor of one which preserves and honors the Lake Tarleton area rather than the present plan which exploits it and leaves it open to further exploitation. There will be irreparable damage and change from the current plan. To what end?
