Comments:

I was born and raised in New Hampshire and have always loved it's natural beauty.

I worked for many years at Kingswood Camp and each day I would start my day gazing across Lake Tarleton and taking in the scenic views of dense healthy woodlands.

and majestic mountain views.

Do not deforest such a perfect example of healthy natural forestation. It would be a step backwards in saving this planet for future generations and promoting clean air for those living in the Lake Tarleton area.
