Comments: I completely and full heartily advocate that expansion of the Taos Ski Valley be reconsidered and aborted. It is incredibly obvious that snow pack has only decreased and will continue to diminish. There is no reason to further impact the mountain and exploit valuable resources to expand business venture that will only decline in value and use. Please use common sense. There are much better ways time, energy, and money could be used than building a bigger playground for affluent people at the expense of the local community and environment.
