Comments: I understand that TSV leases the property. Then why are they allowed to such drastic and gigantic upgrades. TSV continues to say they will not affect the water supply or the environment. Currently here in Arroyo Seco we have so much wild life here at home. The deer, elk, and bear are here during the day. Their natural habitats are in disarray. We know TSV has the funds to pay for their environmental penalties, to them it is not an issue. Build and pay penalties later. How many wells have they drilled and how deep? Who benefits? Not the locals, we can't even afford the price of a one day lift ticket!

I do hope and pray that you see thru the light, TSV intentions are not for the community, the intentions are for themselves. They are going to dry up Rio Hondo and kill the community below.
