Comments: It is with respect that I ask for the reconsideration of the logging/clearing project planned for the Lake Tarleton region. As a property owner of the lake, I am extremely troubled and disappointed by this proposal. Not only are the environmental risks (such as water quality, etc) a huge concern, but the area is pristine and unspoiled, thus offering a unique wilderness character. It is a scenic area and should remain a scenic area. This is why 100's of thousands of dollars were raised years ago to protect this land. Why is that agreement being disregarded? While I understand the role of logging, and am not against it, this is not the place to do so and I sincerely ask that a reevaluation of the location be done. Please help us protect this special piece of the White Mountains ~ it is a treasure to so many and will be significantly harmed with the proposed actions. Thank you.
