Comments: I completely oppose Tarleton Integrated Resource Project #56394. As someone who has grown up around the lake Tarleton area, I have childhood memories of hiking around the very woods that are scheduled to be cut down. This operation will be completely detrimental to the ecosystem and life surrounding lake Tarleton. The views of Websters cliff will be ruined, life on the lake will be ruined, the erosion and degradation of the ecosystem and wildlife of the surrounding area will be irreparable.
