Comments: You must reconsider this project. I have lived in Juneau for 40 years . This area is an assess as it is protected. You must protect what this area is about. The nature we love , bears , wolves , birds nesting and protection of Mendenhall Glacier.Reduce the visitors, do not allow motorized boats on the lake. Motorized boats is another humans absurd idea that will damage this area. If you must build more bathrooms put them underground by where bathrooms are now. Put a video camera up by glacier when you can't see it anymore and show the video inside the present video center. Nature like this has to be protected not developed. Our rate and beautiful places in the world should not be used to make more money. Limit visitors as the rest of the parks in the US are doing. Protect the wildlife here. The nesting terns alone are reason to protect this area. Please don't let this beautiful place my family had treasured all these years be used for profit .
