Comments: I am writing in support of Taos Ski Valley Improvement #61390. The ski valley is in much need of a Gondola connecting the main base area with the Kachina basin. A gondola will greatly facilitate getting skiers to the Kachina Basin in a more efficient manner. Additionally, lift 2 and 8 are slow and in need of being replaced. The replacement of these two lifts would improve the ski valley's operations by improving transportation and mobility of skiers. Adding snowshow trails to the mountain would be a wonderful additional to Taos Ski Valley and provide an alternative winter sport beyond skiing.
