Comments: Thank you for the opportunity to comment. These comments are for the North Zone analysis area. This area is large enough that an Environmental Impact statement is needed before any action is taken on the ground. The Environmental Assessment alone is insufficient. It is my understanding that this project will allow commercial logging inside of Late Successional Reserves and Riparian Reserves. This would be an error. I am also concerned about roads because they impact watersheds and increase sedimentation. The salmon will not like this. There are probably multiple roads that can be put to bed. The agency should maintain high-use roads that serve rural communities and forget about the rest.
