Comments: I am quite opposed to this very large timber sale that has not been thoroughly environmentally vetted and will have disastrous consequences for endangered animals like spotted owls and Humboldt Martens. Aside from that, trees now are much more valuable than before, they will save us from climate change. I am quite sure that you need to breathe too, so please please stop this project, I am very outraged. This is in the north zone of California and touches nearly EVERY part of spotted owl habitat, you could be directly causing their extinction. Also you could be causing our extinction too
