First name: Anna

Last name: Narbutovskih

Organization:

Title:

Comments: We are in a perilous time of climate change. We need to stop taking more from nature than nature can provide. As such, we need to stop utterly destroying our forests which provide us with clean air, clean water and habitat for vital wildlife. Please leave our forests alone. Let them heal themselves from wildfire and all the damage we've done to them. Please let the forests live.
