Comments: USFS,

Hello. I am a citizen of the Taos region and am concerned about the changes proposed in project #61390. These are potentially fundamental changes to the ski valley environment and the Rio Hondo watershed. I ask that a thorough environmental impact assessment be completed and with that, an extended time period for community consideration and comment. These are changes that would enrich the ski valley and it's users, who are becoming more and more, from out of town. But the impacts could be great on the downstream inhabitants of the watershed, people and wildlife alike. Please allow the public to obtain much more information about this project by requiring a complete EIA. Thank you for considering this.

Anne
