Comments: "Taos Ski Valley Gondola and Other Improvements Project

As fires are exploding all around us it seems absolutely absurd to consider expansion of any natural forest and waterway intrusion as we have just lost over 170,000 acres to date in the PECOS alone - and that is before the insane winds to come. We MUST note the weather patterns shift, the environmental damages that we incur DO NOT repair and endanger more wildlife and forest growth.

PLEASE think of our future our heritage our children - but also this land that is enchanted ONLY IF WE are the Stewards versus the Profiteers!!!!

No expansion - save our lands!
