Comments: I object to the Tarleton Integrated Resource Project in the strongest possible terms - I have spent every summer of my life on the gorgeous lake Tarleton and the views and scenery it offers are among the best in the white mountains in my opinion. Doing anything to diminish this rare and precious natural beauty can only be categorized as a mistake. When this land was given to the WMNF it was under the impression that this land would be protected - the WMNF should live up to its commitment and designate Lake Tarleton as a scenic area, out of respect for its beauty and the people who have worked so hard to preserve it.
