Title:

Comments: The project will impact nearly every northern spotted owl Critical Habitat Unit in Northern California and also would allow commercial logging within Late Successional Reserves and Riparian Reserves. The project area is too big and impactful for solely an Environmental Assessment (EA). The agency must conduct an Environmental Impact Statement (EIS) before continuing forward. The agency should focus efforts on high-use roads and other roads that serve a critical purpose, coupled with a review of the existing road network to see which roads were no longer necessary.
