Comments: Agree with the permits but it should be limited to tourists. There are a few thousand residents in this area. Access to our most iconic trails should be a benefit of actually living here and no one should care if that hurts tourists' feelings. We all deal with things like that when we visit other areas, and I always hope / expect that locals get preferential treatment. Please don't institute restrictions that make this a less desirable place to live for those of us who actually want to live here and support our industries. Just work on limiting destruction from tourism, which is exactly what this is from.
