Comments: I ask that the Taos ski valley undertake an Environmental Impact Statment to clarify the cost of large scale development to a beautiful landscape and fragile watershed. I am of the opinion that allowing the ski valley to expand development will primarily enrich the already wealthy owner and investors, and come at a cost to the downstream people of Taos. Already the town is becoming gentrified and too costly for families with hundreds of years of history of living in Taos. I request we put the brakes on this process of development as much as we can to prevent the loss of the unique community and natural beauty of Taos. Not to mention our focus should likely be on preserving water and watershed's considering the ongoing drought, likely to worsen.
