Comments: Dear u.s. Forest Service, PLEASE do a full environmental impact study and do your job to protect the entire Rio Hondo watershed, from headwaters down to the Rio Grande. It is time to stop the Taos Ski Valley from continuing growth and degradation of the entire stream system. PLEASE! Everyone down stream needs that water to LIVE. We don't need more recreation, we need clean water for our families, our trees, our crops. Do not allow more destruction of OUR beautiful National Forest and its waters. PLEASE! And Thank You.
