Comments: Lake Tarleton holds a very special place in my heart, in the hearts of those who I attended camp with. The stunning views provided by the lush forest surrounding the lake are a key part in what made the lake's essence so beautiful and meaningful to me. As far as I understood, when the area around the lake was given to the WMNF it was under the agreement of the preservation and protection of the woods around the lake, not the destruction of them. The area around the lake must be designated as a scenic area. The people who have worked tirelessly to preserve Lake Tarleton cannot be betrayed in this manner. I implore you to reconsider any and all logging around Lake Tarleton. Thank you.
