Comments: As a parent of young man who spent his summer on Lake Tarleton, we need to do everything possible to preserve this special place. The natural beauty of this area is unbelievable. My son has told me several times how special it was to look across the lake and see nothing but TREES! Please do not clear out this special place. We need to protect this area so our children can continue to have an escape to natural beauty. Kids need this more than ever. Do not ruin this escape.
